

Group Interview Protocols

Sam Halioris

Mimi Recker

Spring 2004

1. How could the Instructional Architect be improved?
2. How could the digital resource lessons for Instructional Architect be improved?

After asking these questions and noting responses, if certain areas of specific interest are not covered (with respect to IA and the digital resource lessons), re-direct questions may be needed:

- IA login and account creation
 - IA search function
 - IA web page creation
 - More class time to create lessons
 - More modeling and examples in class
3. Review the measurement instruments and items themselves and ask students what the individual items meant to them and if they were clear or not.
